

Lunch Guide

Various restaurants, some of which are close to the I-House, are listed in the table below. Almost all the restaurants prepare a display or shelf with samples and prices at the entrance, especially for the lunch menu. This makes it easy for you to choose your preferred menu. The prices may be represented in Japanese numerals, but in this case you can use the Arabic vs Japanese numeral conversion table in your ICHEP2000 package.

The number in the first column of the table corresponds to the location on the map.

¥: <500yen, ¥ ¥: 500yen - 1000yen, ¥ ¥ ¥: > 1000yen.
